TESTIMONIALS

Carolyn & I cannot thank you enough for the test run in the demonstrator off road campervan. It towed like a dream & the two weeks of camping in it were pure luxury. It was great to see Carolyn actually enjoying camping.

Greg Langenbaker

Yarmouth Parade, Tamworth NSW.

On a recent camping adventure, enjoyed so very much the ironman simplicity camper. I am impressed with its off-road abilities through crossings & steep inclines. Could not fault any aspect of this van. Comfort, versatility & ease of use easily met our expectations. Can't wait till our next adventure. Great service from the guys at Simplicity.

Debra & Randall Minett

Pacific Highway, Taree NSW.

Not only was I amazed with the structural strength of the caravan, I was very impressed with the maneuverability & how well it handled the inclines, steep hills & bumps off road. It has everything I need & want & I love how it maximizes space. Overall, I believe it to be exactly what our family needed.

Tammy Rushton

Cundletown, NSW.

There are compromises you need to make when it comes to buying a camper, but **safety** and **quality** must never be on that list.

Poorly designed caravans and trailers are at worst, a death trap, and at best, a money pit. You don't have to go far in your research to find the horror stories. The **IRONMAN** Extreme Hybrid Camper has been designed to maximise tow safety on both the blacktop and off-road.

100% Australian Steel Chassis and Frame

The **IRONMAN** is the only Extreme Off Road Hybrid Camper built with an integrated steel chassis and frame. The frame is designed and braced for strength and durability off road.

Hand built to strict Quality Assurance processes

At Simplicity Campers we have decades of experience in ISO Accreditation & associated processes. We manufacture all our campers in accordance to ISO 9001 Quality Management Systems.

But at Simplicity we go a step further, we've established a **"Centre of Excellence"** at our new facility which we believe will be the next generation in quality control. Every step in the manufacturing process involves rigorous inspections & documentation to ensure we deliver a product which far exceeds expectations.

Build documents are supplied with all finished campers so you have the peace of mind that every step has been correctly completed. Feel free to book a factory tour & see our processes in action!
