

UTILITY OFFROAD CAMPER

By **Simplicity Campers**

A mini hybrid camper built tough & designed for comfort.

Presenting a multi use camper which doubles as an all purpose trailer for a multitude of applications

Hand built to strict standards using
100% Australian Duragal steel

Why own just a camper when you can have a toy hauler & work trailer all rolled into one! Traditional camper trailers generally sit in the yard with no other application until the next camping trip. With the **Utility** camper you can transport the motor bikes, the ride-on mower, tools, firewood, bulk water, you name it

FINANCE AVAILABLE FROM AS LITTLE AS \$80 PER WEEK

At Simplicity Campers we understand that everyone has a particular budget & so we set about providing an economical solution to meet the needs of everyday Australians.

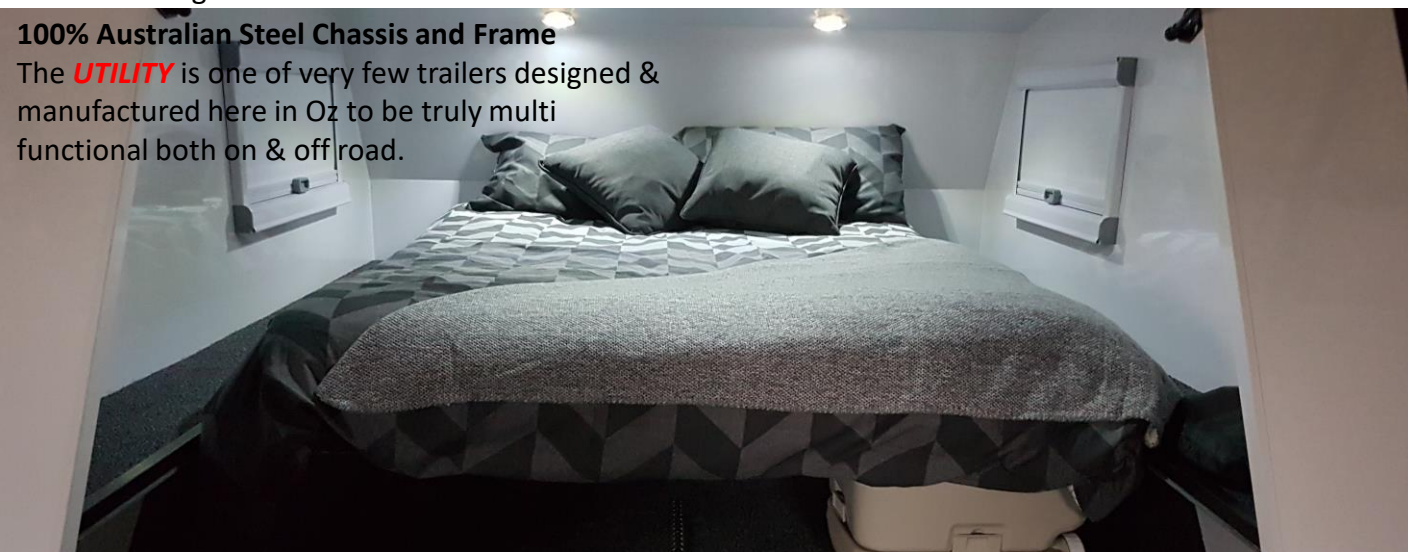

We understand that for many, camping is a process of evolution which progresses from a tent or swag to a canvas camper & eventually to a hard walled van as funds allow. Well, we now offer a solution that allows you to start with a basic camper body at an affordable price whilst utilizing your existing equipment such as portable fridge, solar panels, AGM battery & the likes. You can complete parts of the installs yourself as funds allow or you can select from an array of optional extras to compliment your camping experience.
